VANSHIKA SABHARWAL

CS Undergrad | Python, C++, Web Dev & Blockchain Enthusiast | Problem Solver

vanshikasabharwal400@gmail.com | +91 9773779633 | Delhi, India

linkedin.com/in/vanshika-sabharwal-98a8b9367

CAREER OBJECTIVE

Motivated Computer Science student with a growing foundation in Python, C++, web development, and blockchain. Eager to apply problem-solving skills and a continuous-learning mindset to real-world engineering challenges. Aspiring to build expertise in full-stack development and backend systems, contribute to impactful technology projects, and grow into a skilled software engineer.

EDUCATION

B.Tech – Computer Science & Engineering *2025 – 2029 (Expected)*

Dronacharya College of Engineering, Gurugram

Class XII – PCM (Science) *2023 – 2025*

Nav Gian Deep Public School, Delhi

Class X *2011 – 2023*

Adarsh Public School, Delhi

PROJECT

Smart Yatra – Tourist Safety Application *2025*

Team Project | Key Role: Blockchain Development & Authentication

A smart tourist safety system combining Blockchain, AI-based anomaly detection, Geo-fencing, and real-time emergency response for tourists across India.

- Architected a **Blockchain-based Digital Tourist ID** system with smart contracts for tamper-proof identity verification; designed the KYC layer (Aadhaar/passport-linked) with trip itineraries, emergency contacts, and end-to-end encryption ensuring data protection compliance.
- Built a secure **user authentication system** and contributed to the real-time location tracking module and SOS emergency workflow, enabling instant dispatch to the nearest police unit.
- Delivered a safety-first, accessible UI; collaborated in a team using **Git/GitHub** following agile best practices.

ACHIEVEMENTS

- Team project **waitlisted at Smart India Hackathon (SIH)** — India's largest national-level hackathon, competing against thousands of teams nationwide.
- Actively practising **Data Structures & Algorithms on LeetCode** to strengthen problem-solving foundations.
- Self-directed learning in **web development, backend engineering, and blockchain** alongside the B.Tech curriculum.

TECHNICAL SKILLS

Languages & Frameworks: Python | C | C++ | HTML | CSS | React (learning)

Backend & APIs: Node.js (learning) | REST APIs | SQL

Blockchain: Smart Contracts | Blockchain-based Identity Systems | KYC Integration | Data Integrity & Tamper-proofing

Tools & Platforms: Git | GitHub | Linux (basic) | VS Code

Core Competencies: Problem Solving | Logical Thinking | Debugging | Team Collaboration | Adaptability | Continuous Learning

INTERESTS

Software Development | Web & Backend Systems | Blockchain & Decentralised Apps | Hackathons & Competitive Programming | Chess | Continuous Learning
